Greetings everyone,
 We did not set up the monarch butterfly info/spiration station this weekend. Such a ruckus was made by the jubilant and numerous Howl-er monkeys gathered to exchange poetry at the Museum on Saturday! We decided the monarch butterfly experience would be better held on another day - tbd! We apologize for our confusion and look forward to getting our butterfly on again soon! In the meantime, please do not plant milkweeds on the coast, rather recommend your friends inland and in the East Bay and beyond do so - but only plant native California Milkweeds!

The four native recommended species recommending for planting along their dispersal corridors are *Asclepius californica*, *speciosa*, *fascicularis* and *cordifolia*. No tropical milkweeds should be planted north of the latitude of Orlando. The tropical milkweeds are known to spread a disease to the Monarchs and although the dispersal and range of plants is changing with human impact and disturbance, it does not help the butterflies for us to increase the chemical chaos they are already navigating. In Bolinas and at the coast, please do plant nectar plants that flower in fall and winter - *Ceanothus* is my favorite to recommend because of its immense phenotypic plasticity! They range from ground covers(sp. Yankee Point), to bushes of varying colors and heights, all the way to trees(*arborensis*). For the latest science and to find out how we can all participate in gathering the information that is needed, go to the Xerces Society website: SaveWesternMonarchs.org

Bless us all as we learn how to be truly good stewards of our beautiful home!

THREE GREAT THINGS ABOUT THIS PLACE...

• **The vernal equinox this Wednesday. Every day will have more light than darkness all the way through September. It's spring!**

• **Congratulations to Jake Baumiller—friend, and new President of the Bolinas Soccer Club, after yesterday's chaotic party/election.**

• **Saturday's Dead Night Number Ten. A classic 'Bolinas' night, just as I was bemoaning the disappearance of the sense of community that brought me here. Thank you, Pam Springer, and all who attended.**

--Ned Riley

BOLINAS COMMUNITY PUBLIC UTILITY DISTRICT BOX 390 · 270 ELM ROAD BOLINAS CALIFORNIA 94924 415 868 1224

A Regular Meeting of the Board of Directors
 March 20, 2019 7:30 p.m.

Limited space available, so it's first come first serve. The applications can be picked up at the BCC office Mon-Fri 11am-1pm. April 1st is the application due date.

If you would like to volunteer for this event please contact kate at 415-868-2128 or kateross@bcccenter.org

Dear Community,

Please join us for a community dialogue about health in our community with Coastal Health Alliance CEO, Steve Siegel, and Doctor Anna O'Malley at 6pm on Tuesday March 19th at the Firehouse.

Stinson Beach and Bolinas have long benefited from the presence of local medical care in our clinics, which were built and supported by donations from many individuals, plus Marin County and federal funds.

Many have noticed changes in the experience of receiving care there, and have voiced concerns. Similarly, those working within the changing health care system are experiencing challenges and would like to make things better.

We believe that creating the opportunity for mutual dialogue between community and clinic will be good for this important relationship, and will yield positive solutions and increased understanding. Please do come prepared to listen, to share, and to be a part of the solution-finding effort.

To facilitate an efficient understanding of the scope of concerns, please consider writing an email with your experiences to Ssiegel@coastalhealth.net and copy to: dales_jah@yahoo.com (there's an underscore between the sand the j) by March 15th.

Please include suggestions you may have to make the clinic work well for you and your family.

*With Gratitude,
Dale Johnson and Anna O'Malley*

Merwin Died / Merwin Lives

Poet W. S. Merwin died this weekend. Poems submitted by Nancy Blanchard

QUESTIONS TO TOURISTS STOPPED BY A PINEAPPLE FIELD

do you know whether the
natives grew pineapple
do you know how the land
was acquired to be
turned into pineapple fields
do you know what is done to
the land to turn it into
pineapple fields
do you know how many
months and how
deeply they plow it
do you know what those
machines do are you
impressed
do you know what is in
those containers are
you interested

Listen

with the night falling we are saying thank you
we are stopping on the bridge to bow from the railings
we are running out of the glass rooms
with our mouths full of food to look at the sky
and say thank you
we are standing by the water looking out
in different directions

back from a series of hospitals back from a mugging
after funerals we are saying thank you
after the news of the dead
whether or not we knew them we are saying thank you
in a culture up to its chin in shame
living in the stench it has chosen we are saying thank you

over telephone we are saying thank you
in doorways and in the backs of cars and in elevators
remembering wars and the police at the back door
and the beatings on the stairs we are saying thank you
in the banks that use us we are saying thank you
with the crooks in office with the rich and the fashionable
unchanged we go on saying thank you thank you

with the animals dying around us
and our lost feelings we are saying thank you
with the forests falling faster than the minutes
of our lives we are saying thank you
with the words going out like cells of a brain
with the cities growing over us like the earth
we are saying thank you faster and faster
with nobody listening we are saying thank you
we are saying thank you and waving
dark though it is

-- W.S. Merwin

Nature Notebook By Loretta Farley

The vernal equinox of March 20 is the first day of spring in the Northern Hemisphere and a full moon. With sun directly above the equator, we experience equal amounts of day and night; then the earth begins tilting toward the sun and our days grow longer until the summer solstice.

Wildflower season is off to a slow start as we await warmer temperatures to tempt plants into budding and flowering. California bay trees typically flower from December through April and then produce nuts that ripen by fall. In the meantime, massive fields of lemon-yellow mustard are cropping up. These bright plants are native to western Europe and the Mediterranean countries; introduced to California during the 19th century mission period, they are often found in grape vineyards.

As Northern elephant seal visitors return to sea, year-round harbor seals are coming ashore for their pupping season. Harbor seals move into Drakes Estero and Tomales Bay seeking sandbars and quiet beaches to deliver their pups. Like the elephant seals, harbor seals nurse for about a month. Normal adult seal behaviors include leaving a pup alone onshore as they look for food—give all marine mammals a wide berth.

Winter rains have been reshaping the landscape. Slides have undermined roads and collapsed cliffs across the Point Reyes Peninsula, and Chicken Ranch Beach has been remodeled as creeks overflowed and brought more sediment into the bay. Please be careful and stay away from cliff and creek edges where water softened soils are often prone to collapse.
